PROFESSIONAL SUMMARY

Quality Assurance professional with over five years of experience in laptop manufacturing, progressing from production operations and leadership to In-Process Quality Control (IPQC). Experienced in product quality control, first-piece inspection, process audits, defect analysis, and corrective actions. Actively drives continuous improvement through 5S/5R implementation, workplace standardization, and sticker application jig development. Developed digital quality finding and automated daily reporting systems to enhance traceability and support management performance reviews

PROFESSIONAL EXPERIENCE

PT Tera Data Indonusa Tbk (Axioo) | Jakarta, Indonesia

Quality Assurance Staff – IPQC Apr 2024 – Present

- Conduct first-piece and production-line readiness inspections; audit processes and operator compliance with work instructions (IK/E-SOP).
- Verify production orders (SRORD), bills of materials (BOM), component specifications, and accessories to prevent product and material mismatches.
- Investigate quality nonconformities, coordinate containment and corrective/preventive actions (CAPA), and stop the line when critical quality risks are identified.
- Analyze defect trends, prepare NG/DOA and audit reports, and support quality-awareness training and process standardization.
- Represent the company at industrial visits and lead factory tours for government agencies, universities, and educational institutions; present production and quality-control practices.

Production Leader Jul 2022 – Mar 2024

- Consistently achieved daily production targets throughout nearly two years of leadership through effective manpower allocation, production monitoring, and operational control.
- Enforced operator discipline and compliance with work instructions to minimize process errors, ensure assembly accuracy, and maintain production quality standards.
- Managed component preparation, material readiness, and part placement before assembly to prevent missing, misplaced, or incorrect components during production.
- Led daily briefings, supervised operators, monitored production performance, and coordinated with Quality Control, Maintenance, and PPIC to maintain operational efficiency.

Demonstrated strong leadership, consistent target achievement, and proactive quality control, leading to promotion to *Quality Assurance Staff – IPQC* in April 2024.

Production Operator – Quality Apr 2022 – Jun 2022

- Performed Verified laptop hardware specifications, including RAM, storage, LCD display, keyboard, camera, and other components to ensure compliance with production requirements.
- Performed functional testing, visual inspections, and product validation to ensure laptop functionality and conformity with quality standards.
- Identified and reported product defects, supported nonconforming product segregation, and coordinated with production teams for corrective actions

Production Operator Intern Sep 2021 – Mar 2022

- Assembled laptops, installed components, verified material readiness, and performed functional checks and self-inspections against work instructions.

KEY PROJECTS & ACHIEVEMENTS

Axioo Sekar Agri – Agricultural Drone Manufacturing Project

Contributed to the end-to-end manufacturing and assembly of the Axioo Sekar Agri agricultural drone, from Completely Knocked Down (CKD) components to Finished Goods, supporting the company's Domestic Component Level (TKDN) initiative. The drone is designed to transport and spray water, fertilizers, and crop-protection solutions for agricultural applications.

5S/5R Implementation & Workplace Standardization

Introduced standardized floor markings, designated storage areas, and clear OK/NG unit labels to improve workplace organization and reduce the risk of unit mix-ups.

Automated Daily Review Reporting Template

Developed a spreadsheet-based daily reporting template that streamlined production and quality data compilation and simplified management performance reviews.

Sticker Application Jig Development

Designed and implemented a jig for unit and box labels to improve placement accuracy and consistency, simplify operator work, and help reduce labeling-related customer complaints.

Digital Quality Finding & Risk Assessment System

Built a Google Forms-based quality finding system using Severity, Occurrence, and Detection criteria to support risk prioritization, traceability, and corrective-action follow-up.

TECHNICAL SKILLS

Inspection & Quality Control: First Piece Inspection (FPI), In-Process Quality Control (IPQC), Process Auditing, Product Inspection, BOM Verification, and Nonconforming Product Control.

Problem Solving & Quality Improvement: Root Cause Analysis (RCA), 5 Whys, Fishbone Diagram, QC Seven Tools, CAPA, PDCA, and FMEA.

Continuous Improvement: Lean Manufacturing, 5S/5R Implementation, Workplace Standardization, and Process Improvement.

Production Leadership & Management: Production Line Supervision, Manpower Allocation, Operator Training, Production Performance Monitoring, and Cross-Functional Coordination.

Data Analysis & Reporting: Microsoft Excel, Defect Trend Analysis, Quality Reporting, and Data Visualization.

EDUCATION

Universitas Pamulang | 2025 – Expected 2026
Bachelor of Engineering in Industrial Engineering (In Progress)

SMK Islam Inayah Ujung Batu | 2018 – 2021
Computer and Network Engineering

CERTIFICATIONS

- Vocational Competency Certificate – Computer and Network Engineering
- Certificate in Optimizing Global Transformation Through Engineering Innovation and Ethics
- Industrial Internship Certificate – PT Tera Data Indonusa Tbk
